

Twinkle twinkle
little star,
how I wonder
what you are,
up above
the world so high,
looking down
at dangerously
high levels of
CO₂ in the
atmosphere.

The science shows that climate change is caused by heat-trapping gases such as CO₂, which is created whenever we use energy like electricity made from gas, oil or coal. As CO₂ levels rise, more and more heat is trapped in the atmosphere, causing changes in our climate.

IT'S OUR CHILDREN WHO'LL REALLY PAY THE PRICE
